

How to dose 100mg/5ml ibuprofen for rats

You will need:

- a scale that measures in grams, kitchen scales are the best
- Childrens liquid ibuprofen (usually comes with a syringe!)
- Some syringes

Instructions:

1. Weigh your rat, make sure this is done in GRAMS
2. Measure your dosage according to the chart below
3. If your rat is hesitant, you can mix the medicine into baby food.
4. Give with food/after feeding to avoid an upset stomach

Can be given every 4, 5 ,8 or 12 hours as needed

Minor pain & Discomfort	Sever pain & Discomfort
-------------------------	-------------------------

RAT WEIGHT	DOSE (ml)	RAT WEIGHT	DONE (ml)
100	0.08ml	100	0.15ml
150	0.11ml	150	0.22ml
200	0.15ml	200	0.30ml
